Linking Food Systems and Climate Change

Connecting Pollan and Shiva

- Industrial agriculture's reliance on oil
- Beef industry's contribution to greenhouse gases
- Big Organic's reliance on shipping (i.e. food miles)

U.S. Greenhouse Gas Emissions in 2015

Total Emissions in 2015 = 6,587 [Million Metric Tons of CO₂ equivalent](#).

2015 U.S. Methane Emissions, By Source

Note: All emission estimates from the [Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990-2015](#).
